**Step 1: Organize your wallpaper strips**
Lay out all strips in order on the floor according to the number marked on the bottom of each strip.
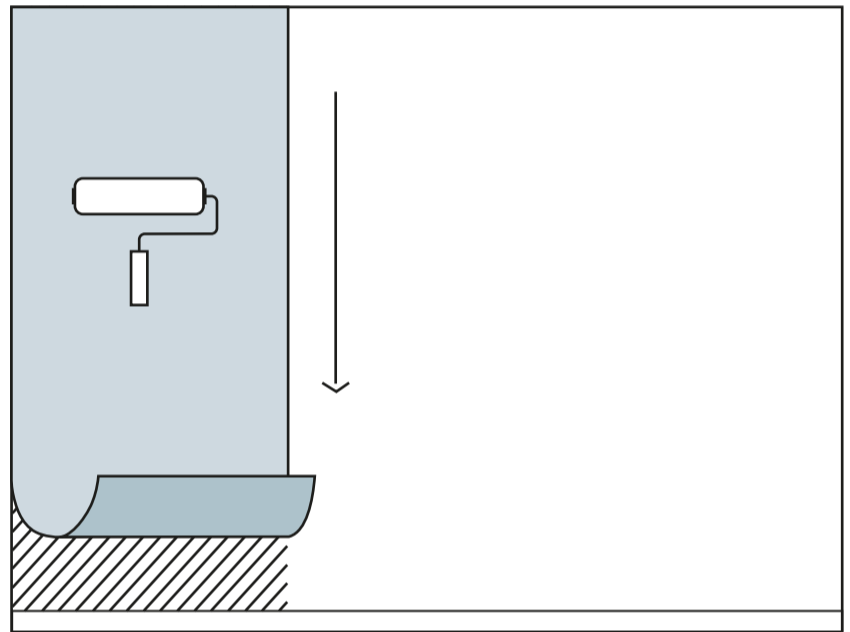

Step 2: Measure and Mark Start Point
Measure the wall and mark your starting point, or start in the left corner if covering the entire wall.
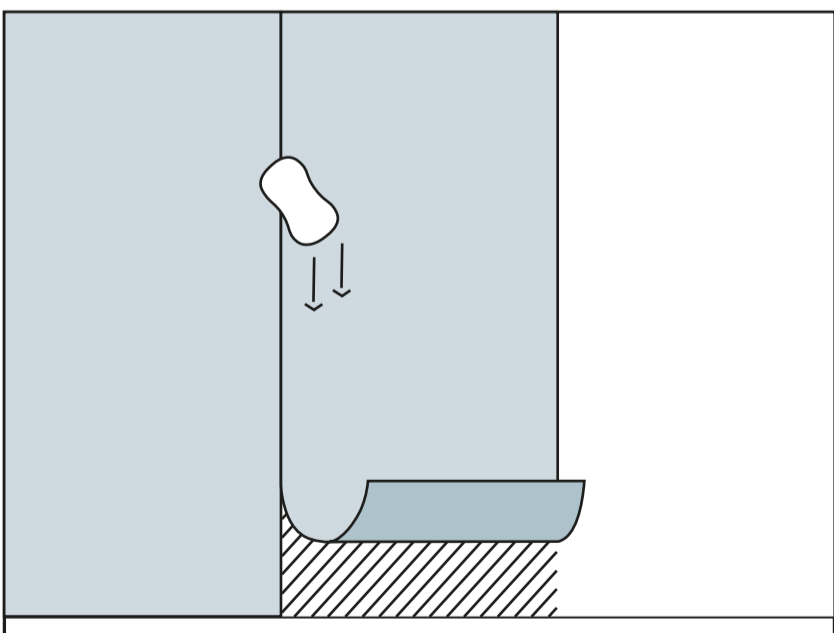

Step 3: Applying Paste
Stir the paste to the correct consistency - slightly thick. Apply an even coat to the wall using a roller.
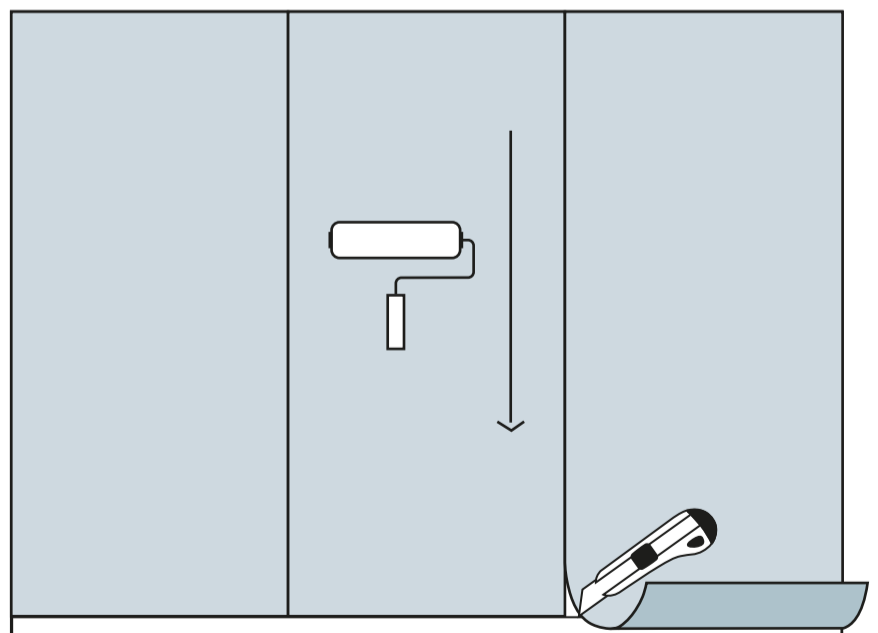

Step 4: Hanging the First Strip
Hang the left-most strip according to your start mark or wall. Apply the first starting from the top and working downwards. Carefully smooth down with a roller.

Step 5: Hang consecutive Strips
Hang following strips edge to edge without overlaping. Gently wipe away any excess paste with a damp, soft sponge. Do not rub.

Step 6: Finishing Touches
After all strips have been applied, pass the roller through all the strips to ensure adhesion. Trim away excess paper with a sharp knife. Stand back and admire your new wall!
